PROFESSIONAL EXPERIENCE

TOMOSIA Co.,Ltd

Apr 2024 – Oct 2024

Project: Hananoya Chatbot

Position: Front-end Developer

- **Project Description:** The project aims to develop an intelligent chatbot capable of interacting with users, providing information, answering questions, and assisting users in various fields. The chatbot uses the OpenAI API to deliver natural and accurate responses.
- **Team size:** 4
- **Responsibilities:**
 - Developed and customized the chatbot's user interface, ensuring a seamless integration across multiple pages for an optimal user experience.
 - Implemented features for interface configuration, allowing users to customize the chatbot's appearance and settings.
 - Collaborated with team members to perform testing, identify bugs, and optimize the chatbot's performance for better speed and interactivity.

Project: Premium matching app

Position: Front-end Developer

- **Project Description:** The online dating application aims to connect singles with shared interests and goals in love. The application provides a safe and enjoyable platform for users to seek serious relationships or friendships.
- **Team size:** 6
- **Responsibilities:**
 - Responsible for developing and managing the messaging functionality, ensuring smooth interaction and security for users.
 - Set up and optimized system settings options to allow users to customize their experience.
 - Developed a notification system using Firebase Cloud Messaging (FCM) and Service Workers, ensuring users receive timely alerts even when the app is in the background or the browser is closed.
 - Worked closely with backend developers and designers to ensure smooth front-end and back-end integration.

EDUCATION

University of Transport and Communications

Aug 2024 – Present

- Major: Information Technology

FPT Polytechnic Hanoi Collage
